Dumpster Enclosure Requirements
Rev. 1/15/2014

City prefers no enclosure.

If owner prefers an enclosure the following applies:

- Enclosure gate opening must be at least 10' wide per dumpster.
- Enclosure depth must be at least 20' deep.
- NOTE: If there is an expected need for additional dumpsters, the width must be multiplied by the number of dumpsters.
- Gates are NOT preferred.
- If the owner insists upon gates, they must be 18" off the ground and latch with a single latch.
- The enclosure must have an obstruction free area 75' in front of the opening to allow the garbage truck to drive up and align with the dumpster.
- If these requirements cannot be met then the enclosure is forbidden.
